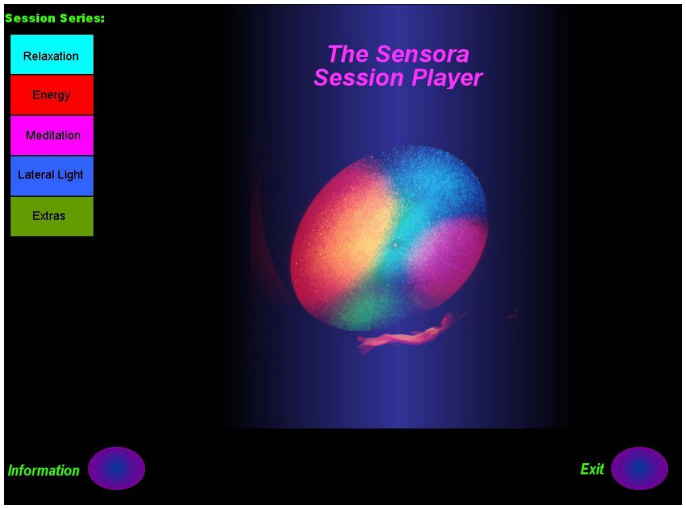
1 OVERVIEW

The **Sensora Player** is a software package enabling your Sensora™ system to playback multi-sensorial sessions. These sessions are special multimedia programs incorporating sound, light and kinesthetic information. Sessions played with the Sensora Player software run on all Sensortech Light Modulation™ processors and projectors (such as the LPA-2, LPA-3 or SD-2), as well as all Sensortech Dynamic Transduction Chairs (such as the TC-2 or TC-3) if your Sensora system includes one.



Sensora Player is the main tool to playback **Core Sessions,** which form the basis of the Sensora's capabilities and have been developed by a team of experts involving psychologists, psychotherapists, physicists and artists. Typically lasting 20 to 25 minutes, each Core Session is designed for a different application having its own specific range of colors and frequencies. Musical scores are adapted from top composers specializing in the field of relaxation music, and are combined with natural sounds recorded around the world; if your Sensora system is equipped with the surround-sound option, they make full use of Sensortech's Sound Spatialization technology.

Details on the library of currently available Core Sessions are given in Section 4. As this library keeps expanding, Sensora operators will always be able to renew their system's possibilities. Core Sessions not yet contained in your collection can be purchased individually from Sensortech. Check the www.sensora.com web site to view the latest Core Sessions.

In addition to Sensortech's Core Sessions, the Sensora Player also enables the playback of Sensora sessions created through the Sensora Sequencer Advanced Tool. This software tool allows Sensora users to program their own Sensora multi-sensorial sessions, and to distribute them to other users for playback on their Sensora Player *(see Section 3.4).*

Sensora Player has an **Enqueue function** allowing you to enqueue two or more Sensora sessions for automatic sequential playback *(see Section 3.2).*

2 GETTING STARTED

2.1 SOFTWARE INSTALLATION

Sensora Player is compatible with Windows XP, Windows Vista and Windows 7.

To facilitate sharing common resources (such as music, Playlists and light patterns), all Sensora software share specific common directories for programs, data and music. The first time you install Sensora Player on your PC, the following default directories will be suggested:

Sensora Programs	in	"Program Files\Sensora"
Sensora Data	in	"My Documents\Sensora Data"

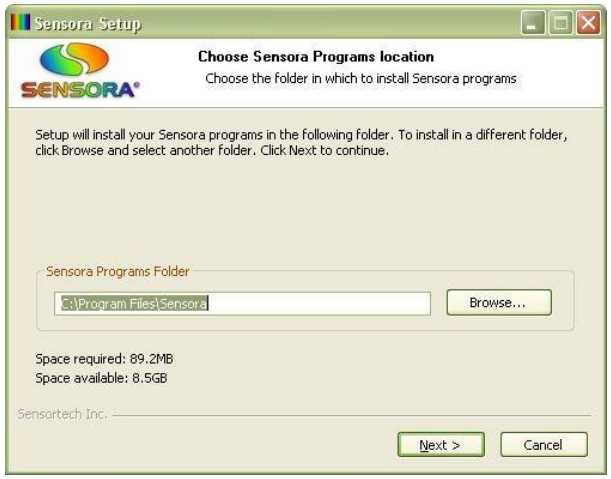
During installation you can accept these directories, or freely select new ones.

If you have previously installed other Sensora software on your PC, the existing Sensora directories will automatically be suggested during installation: to ensure harmonious operation of all Sensora programs these should be accepted.

The installation program will also automatically install the USB drivers needed to communicate with your Sensortech light projector (such as LPA-2 or LPA-3). and your Sensortech Transducer Chair (such as TC-2 or TC-3) if you have one.

To install, follow these steps:

- Using Windows Explorer, locate your installation CD and double-click on the "**Install Sensora Player**" entry.
- Click "Next" to accept the default Sensora Programs directory, or "Browse" to select a new one, as shown below:



Sensora Setup
SENSORA
Choose Sensora Programs location
Choose the folder in which to install Sensora programs
Setup will install your Sensora programs in the following folder. To install in a different folder, click Browse and select another folder. Click Next to continue.
Sensora Programs Folder
C:\Program Files\Sensora
Browse...
Space required: 89.2MB
Space available: 8.5GB

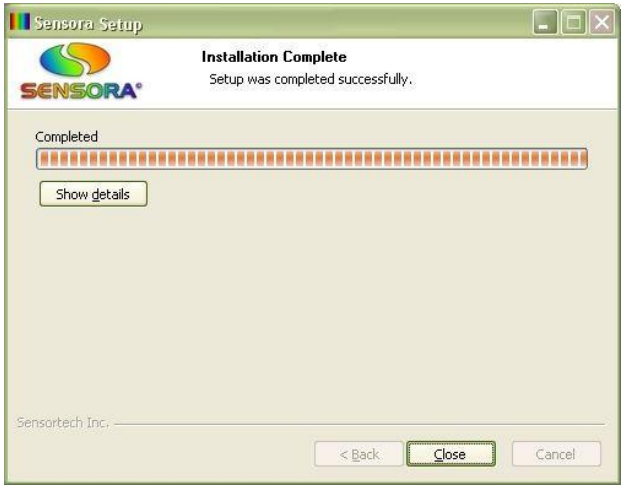
Install
Cancel

- When completed, the following page will be displayed; click "Close" to exit.



2.2 CORE SESSION INSTALLATION

Sensortech's Core Sessions are delivered as an executable "Install" file, either downloaded or on an installation CD. They are usually labeled **"Install Core Session - session name.exe"**.

To install a Core Session, simply locate this file using Windows Explorer and double-click it. After you authorize the install, the Core Session will automatically be copied to your Sensora session collection, and should appear in the list of available sessions within its Series on the Sensora Player menu.

Note: *you need to restart Sensora Player after any new Core Session installation, otherwise the new session(s) will not appear.*

2.3 SEQUENCER SESSION INSTALLATION

Sensora sessions created by the Sensora Sequencer Advanced Tool can be exported as files labeled as "**session name.sss**" and distributed through download or CD. To install such a Sequencer session on your Sensora Player, follow these steps:

- Start Sensora Player.
- Press the "Control-I" key combination on the PC keyboard. This will bring up a file selection box.
- Locate the new Sequencer session "*.sss" file and click "Open".

The session will then be automatically copied to your Sensora session collection, and should appear under the "Sequencer" Series tab on the Sensora Player menu.

Note: *you can also install a Sequencer session by clicking the* ***"Import Session"*** *button on the* ***"Sensora Sequencer Sessions"*** *screen of Sensora Player (selected with the* ***"Sequencer"*** *Series tab - see Section 3.4). If this button is not visible, you may need to click "Control-D" to unhide it (see Annexes 1 and 2).*

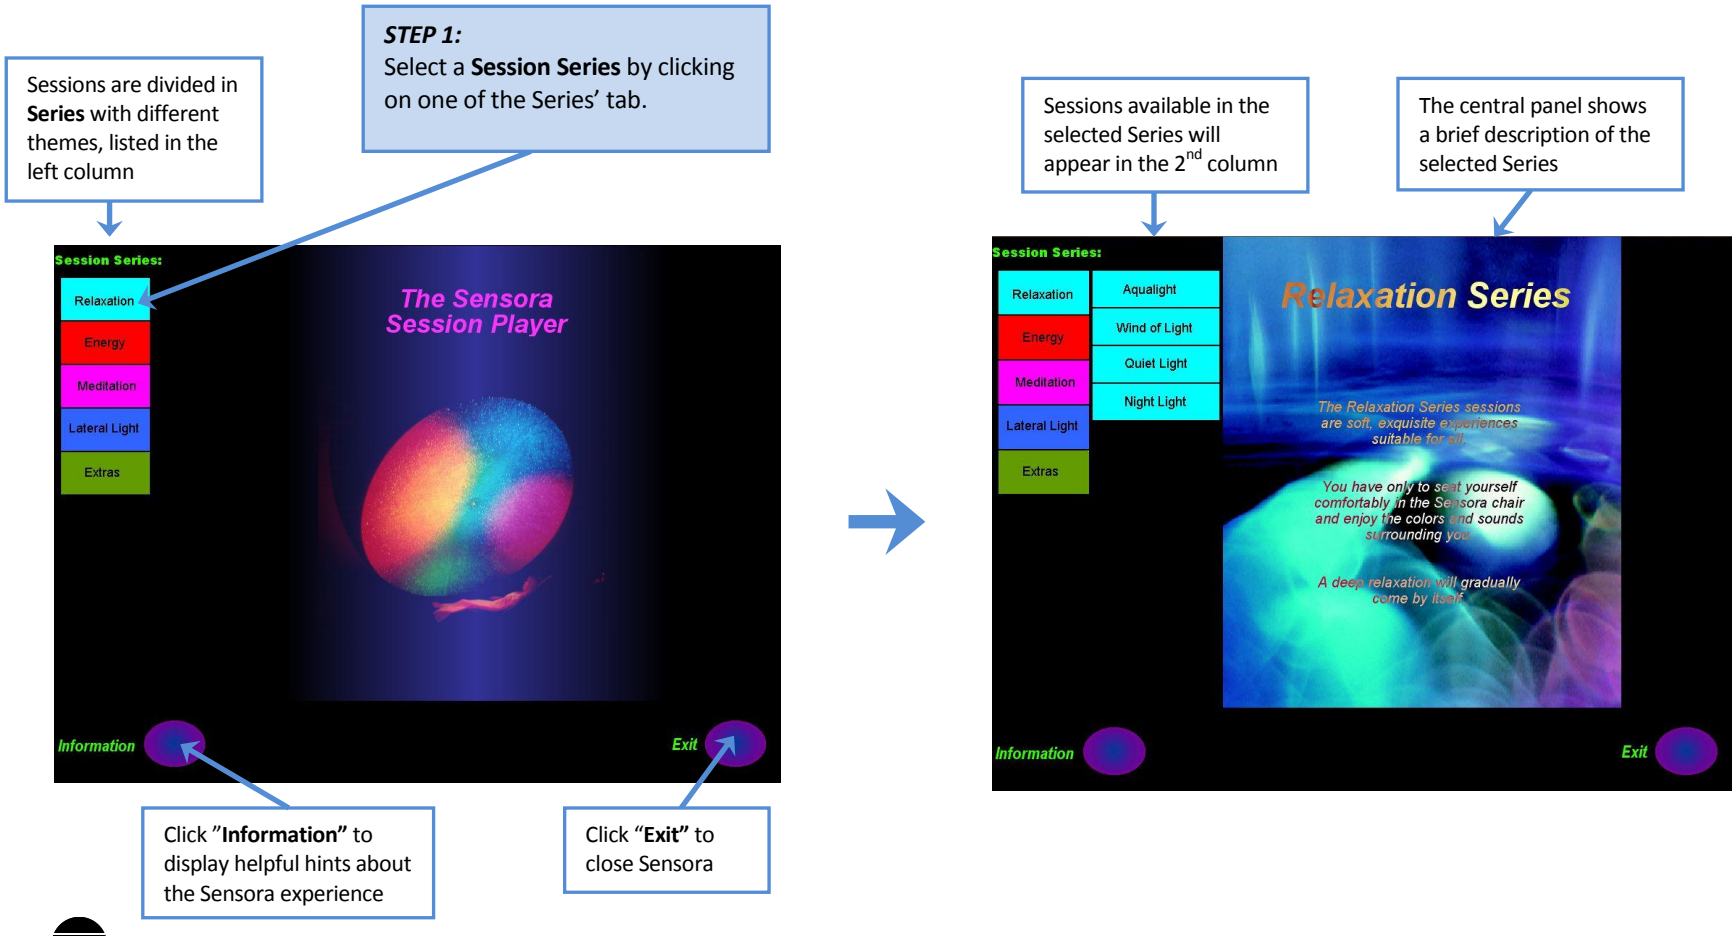
3 PLAYING A SENSORA SESSION

3.1 PLAYING A SINGLE SESSION

When you start the Sensora Player program, you are presented with the **"Main Menu"** screen shown here.
To play a Sensora Session, do these simple steps:

- Select a **Session Series** (Step 1), then a **Session** (Step 2)
- Click the ***"Start Session"*** button (Step 3)

That's all! The "**Session Playback"** screen will appear *(see Section 3.3 below)* and your Sensora session will start playing.

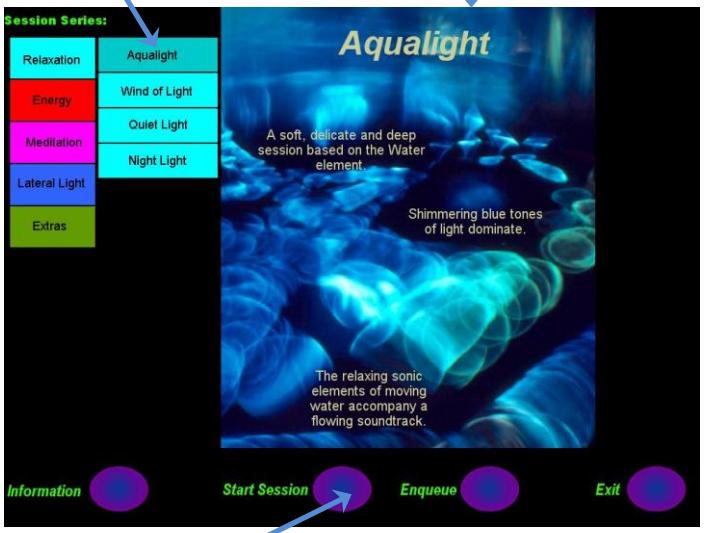


Sessions are divided in **Series** with different themes, listed in the left column
STEP 1:
Select a **Session Series** by clicking on one of the Series' tab.
Session Series:
Relaxation
Energy
Meditation
Lateral Light
Extras
The Sensora Session Player
Information
Exit
Click "**Information"** to display helpful hints about the Sensora experience
Click "**Exit"** to close Sensora
Sessions available in the selected Series will appear in the 2nd column
The central panel shows a brief description of the selected Series
Aqualight
Wind of Light
Quiet Light
Night Light
Relaxation Series
The Relaxation Series sessions are soft, exquisite experiences suitable for all.
You have only to seat yourself comfortably in the Sensora chair and enjoy the colors and sounds surrounding you.
A deep relaxation will gradually come by itself.

PLAYING A SINGLE SESSION *(CONTINUED)*

STEP 2:
Select a Session by clicking on its tab

The central panel shows a brief description of the selected Session

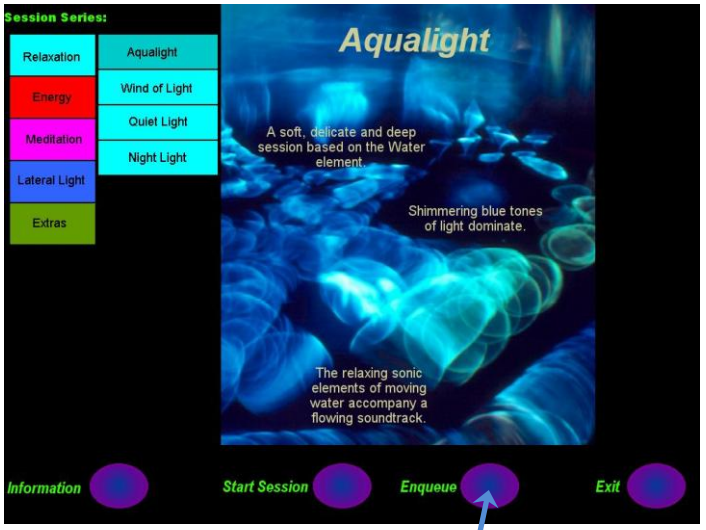


STEP 3:
Play the selected Session by clicking the ***"Start Session"*** button

3.2 PLAYING A SESSIONS QUEUE

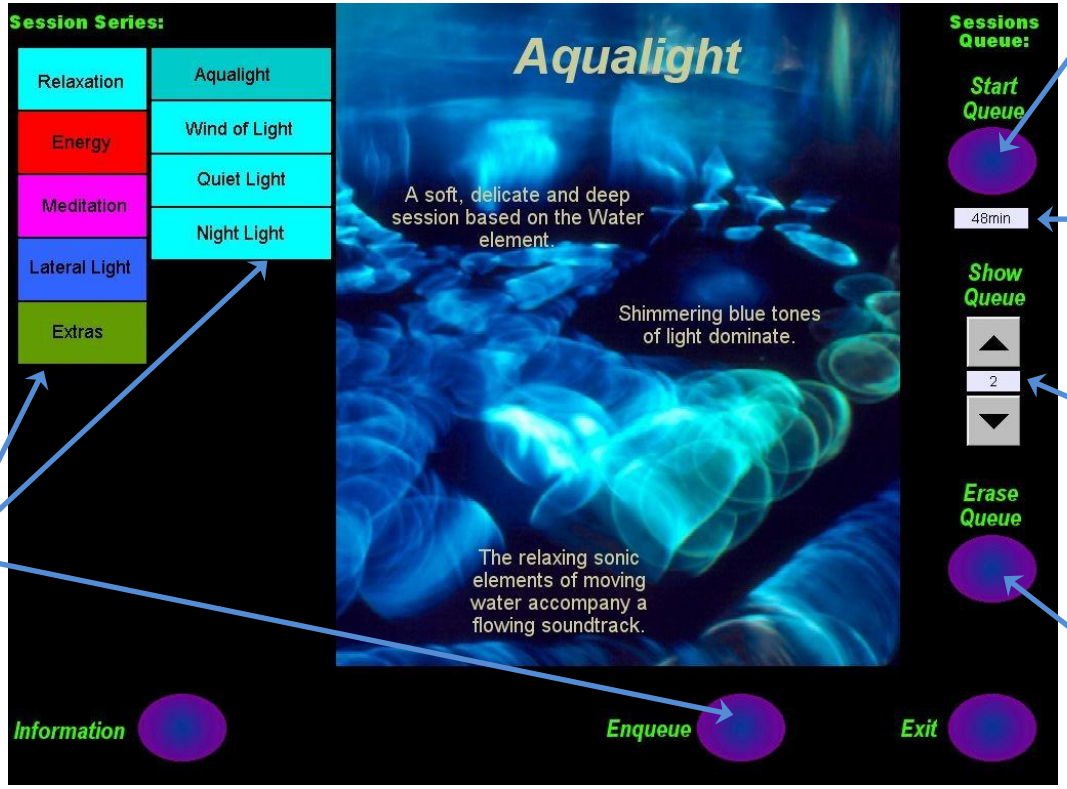
<u>If you want to play two or more Sessions, use the **Enqueue function**</u>:

- Select a **Session Series** (Step 1), then a **Session** (Step 2) as shown above
- Create a Sessions Queue by clicking the ***"Enqueue"*** button (Step 4). The selected Session will be the first one in the new Queue.
- Add one or more Sessions by repeating the above Steps (1, 2, 4) for each added Session (Step 5)
- When the Queue is completed, play it by clicking the ***"Start Queue"*** button (Step 6)



STEP 4:
Add the selected Session to the playback queue by clicking the ***"Enqueue"*** button

PLAYING A SESSIONS QUEUE *(CONTINUED)*



STEP 5:
Add more Sessions to the Queue by selecting a **Series**, a **Session,** and clicking ***"Enqueue"*** for each additional Session

STEP 6:
Play the Sessions Queue by clicking the ***"Start Queue"*** button

This box shows the total playback duration of the Queue

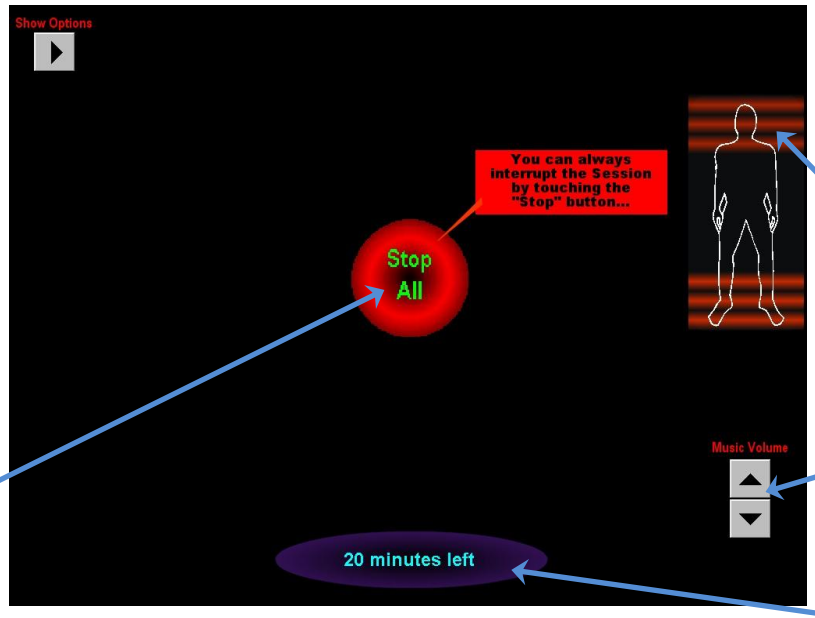
This box indicates the order number of the currently viewed Session in the Queue. Click the ***"Up"*** or ***"Down"*** arrows to review each Session

Click ***"Erase Queue"*** to delete the Queue *(careful: erasing cannot be undone!)*

3.3 SESSION PLAYBACK SCREEN

When you click ***"Start Session"*** (or ***"Start Queue"),*** the **"Session Playback"** screen show here will appear:

- At this point, ***you only need to sit back and relax*** through your Sensora session. The controls available on this screen (as detailed below) are all optional, and you usually won't need to touch them.
- The screen will automatically blank out after a few seconds, in order to prevent its stray light from interfering with the ongoing Sensora session. ***To bring it back at any moment, just click anywhere on the screen.***



The "**Transducer Man**" picture will appear only if your system is equipped with a Sensortech Transduction Chair. It displays the current kinesthetic vibration pattern.

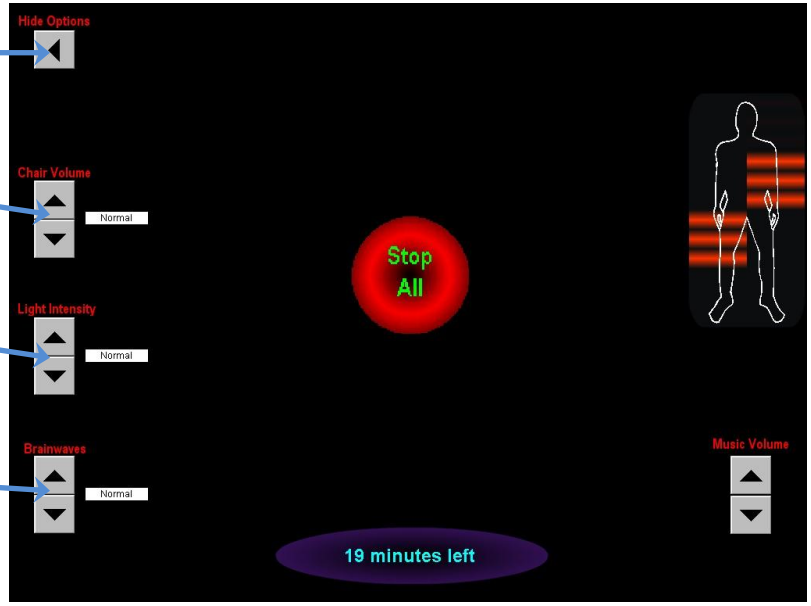
Click on the pattern to zoom it to the whole screen. Click again to restore the playback screen.

The "***Music Volume***" buttons let you adjust the soundtrack volume.

This counter shows how much time is left before session completion.

Clicking the "***Stop All***" button allows you to interrupt the ongoing Sensora session at any moment. The light projections and soundtrack will stop, and the **"Session Paused"** screen will appear (shown next page).

Clicking the "***Show Options***" button during session playback reveals 3 sets of optional controls.



The "***Chair Volume***" buttons adjust the intensity of the kinesthetic vibration in your Sensora Transducer Chair (if so equipped).

The "***Light Intensity***" buttons adjust the overall brightness of the Sensora light projections.

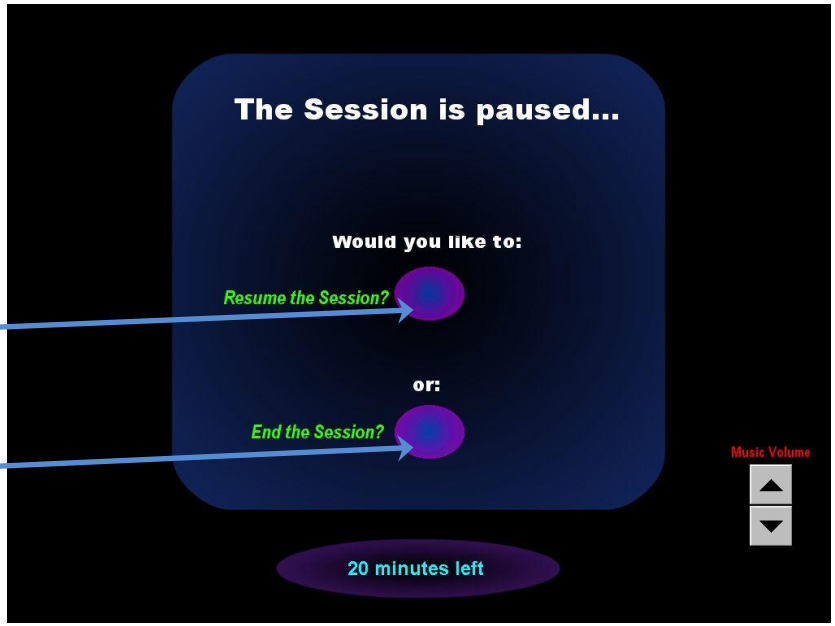
The "***Brainwaves***" buttons adjust the intensity of the brainwaves modulations embedded in the Sensora light projections *(refer to you Sensortech light projector User's Manual).*

SESSION PLAYBACK SCREEN *(CONTINUED)*

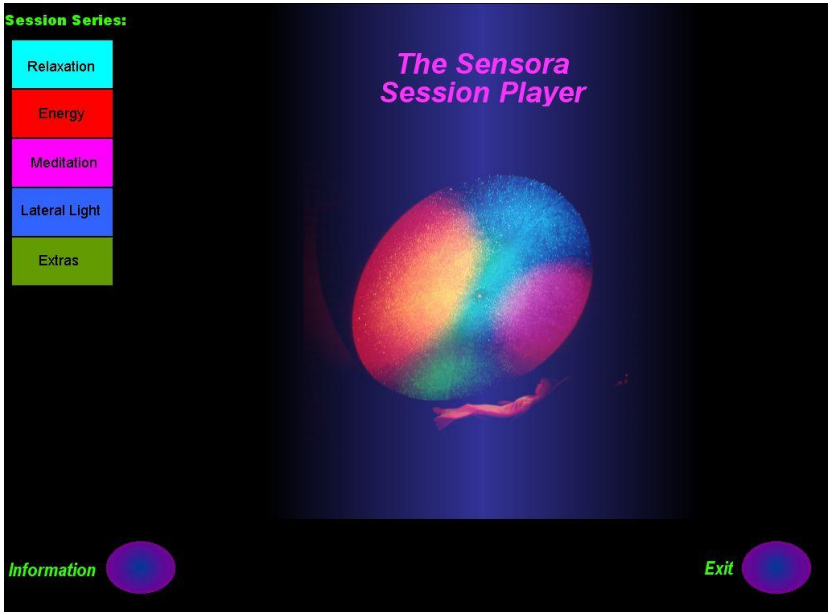
If you have interrupted on ongoing Sensora session by clicking the ***"Stop All"*** button (in the center of the "**Session Playback"** screen), this "**Session Paused**" screen appears:

Clicking the ***"Resume the Session"*** button restarts the Sensora session at the point where it was interrupted.

Clicking the ***"End the Session"*** button aborts the Sensora session and directly brings you back to the **"Main Menu"** shown below.

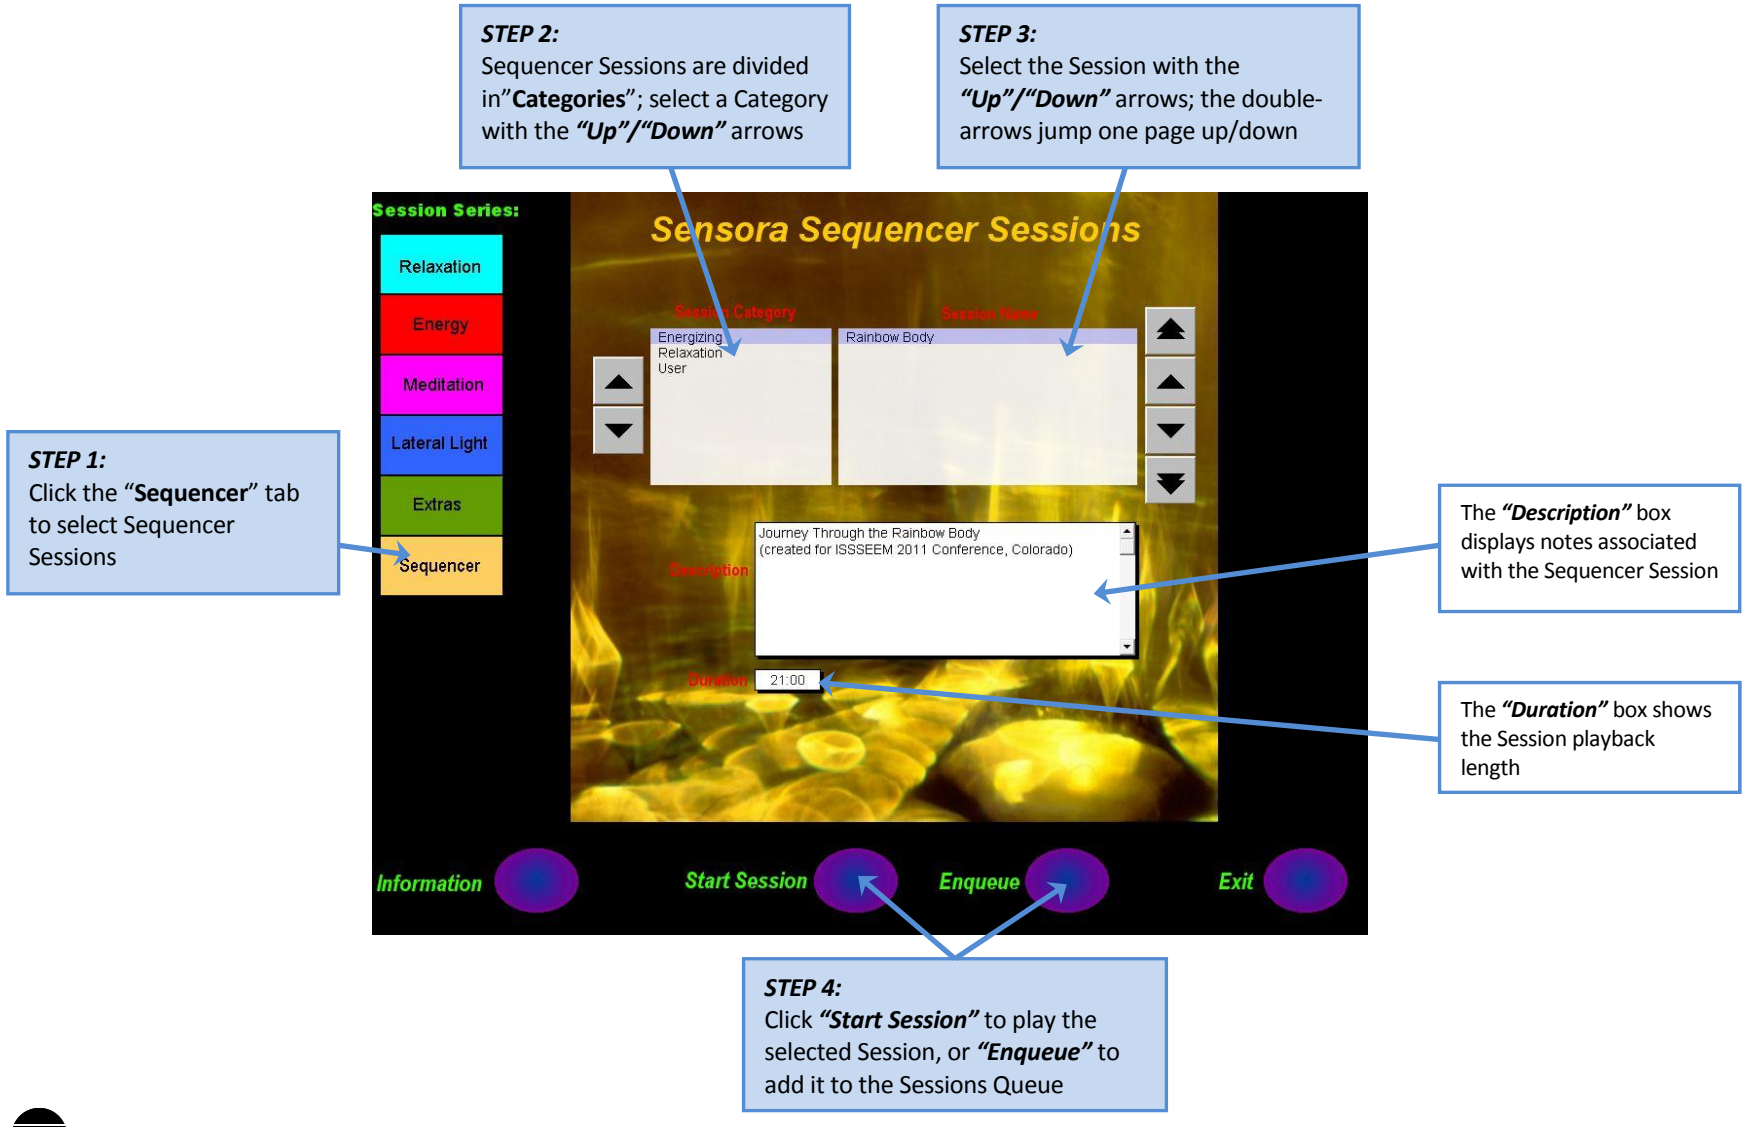


At the end of the Sensora session, the **"Main Menu"** will automatically reappear:



3.4 PLAYING A SEQUENCER SESSION

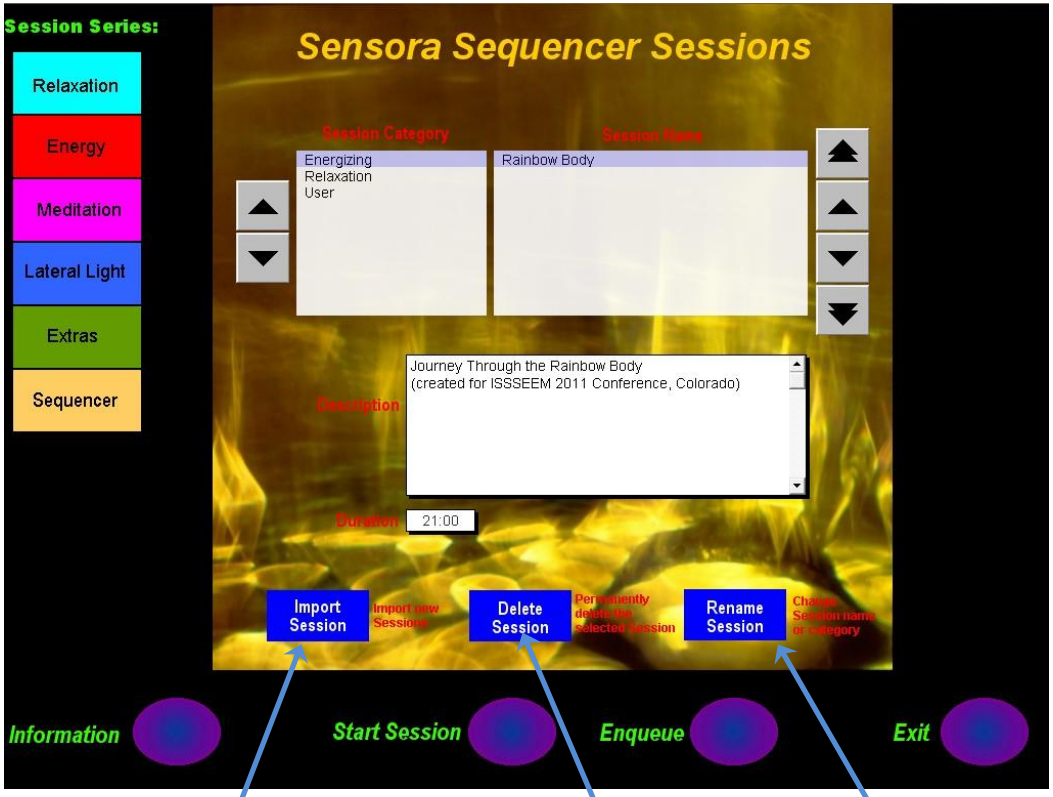
The Sensora Sequencer Advanced Tool allows Sensora operators to program their own Sensora multi-sensorial sessions, and to distribute them to other users for playback on their Sensora Player. If you have imported such a Sequencer Session *(see Section 2.3)*, a new **"Sequencer"** Series tab will automatically appear at the bottom of the **Session Series** column. Sequencer Sessions can be selected just as Core Sessions, after first clicking the **"Sequencer"** Series tab:



PLAYING A SEQUENCER SESSION *(CONTINUED)*

The Sequencer Sessions screen contains 3 buttons allowing the management of Sequencer Session files, shown below: ***"Import Session"***, ***"Delete Session"*** and ***"Rename Session".***

Note: *to prevent unauthorized modifications of your collection by users, these 3 buttons can be hidden/shown with the keyboard shortcut "Control-D" (see Annexes 1 & 2).*



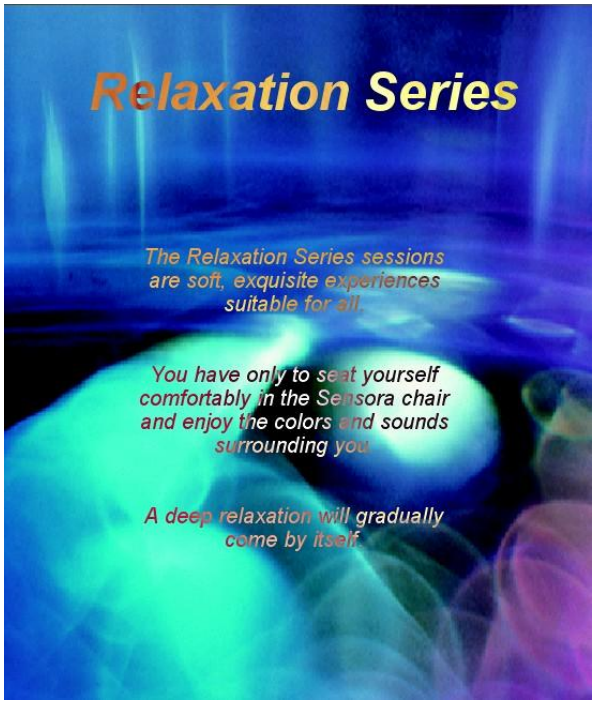
Click ***"Import Session"*** to import a new Sequencer Session (file type **"session name.sss"**)

Click ***"Delete Session"*** to delete the currently selected Sequencer Session *(caution: deletion cannot be undone)*

Click ***"Rename Session"*** to rename the currently selected Sequencer Session; you can also move the Session to another Category through the file selection box.

4 CORE SESSIONS LIBRARY

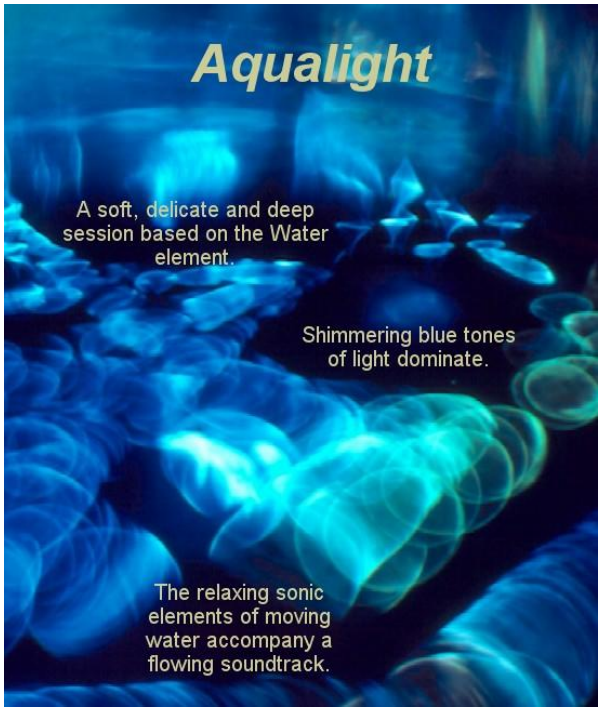
4.1 RELAXATION SERIES



Relaxation Series
The Relaxation Series sessions are soft, exquisite experiences suitable for all.
You have only to seat yourself comfortably in the Sensora chair and enjoy the colors and sounds surrounding you.
A deep relaxation will gradually come by itself.

The **Relaxation Series** sessions are soft, exquisite experiences suitable for all. You have only to seat yourself comfortably in the Sensora chair and enjoy the colors and sounds surrounding you. A deep relaxation will gradually come by itself.

AQUALIGHT



Aqualight
A soft, delicate and deep session based on the Water element.
Shimmering blue tones of light dominate.
The relaxing sonic elements of moving water accompany a flowing soundtrack.

A soft, delicate and deep session based on the Water element. Shimmering blue tones of light dominate, the innately relaxing sonic elements of moving water accompany a flowing soundtrack.

Aqualight can be a beautiful introduction to Sensora for first-time users.

DURATION: 25 minutes

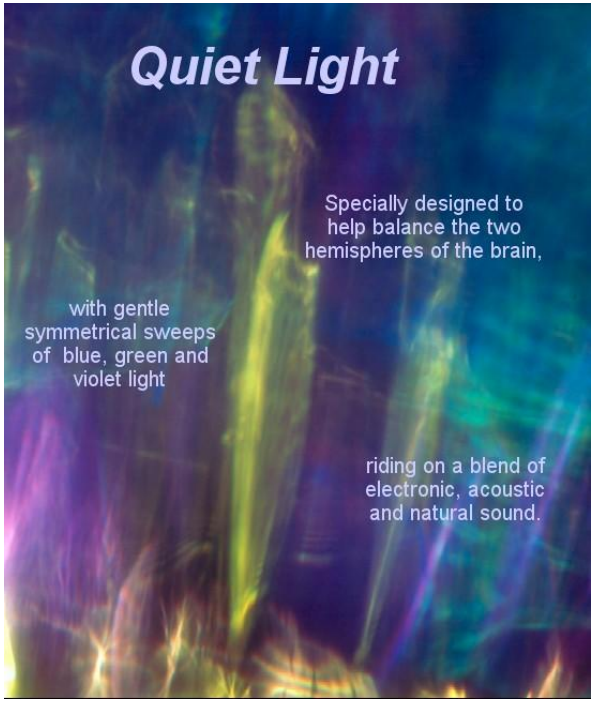
WIND OF LIGHT

Wind of Light
Feel the openness
of a cool forest breeze
in this session based
on the Air element.
Music and the wide
frequency sweeps of wind sounds
merge with green and blue colors.

Feel the openness of a cool forest breeze in this session based on the Air element. Music and the wide frequency sweeps of wind sounds merge with green and blue colors.

DURATION: 25 minutes

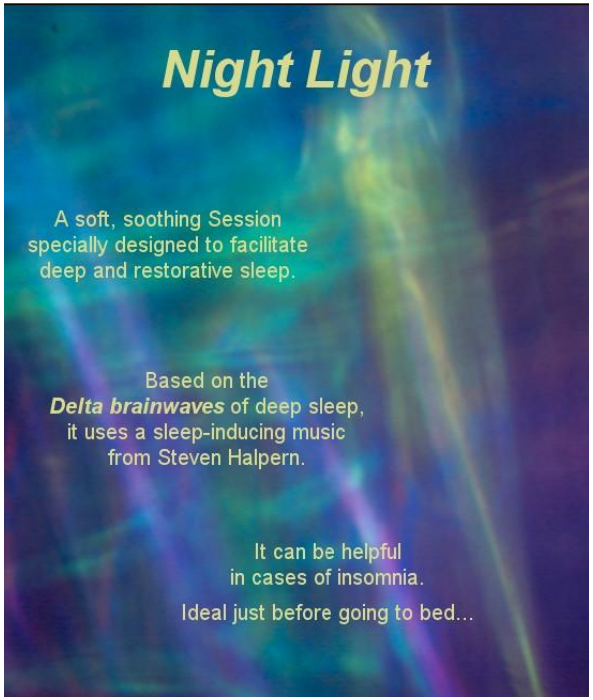
QUIET LIGH



Specially designed to help balance the two hemispheres of the brain, with gentle symmetrical sweeps of blue, green and violet light riding on a blend of electronic, acoustic and natural sound.

DURATION: 24 minutes

NIGHT LIGHT

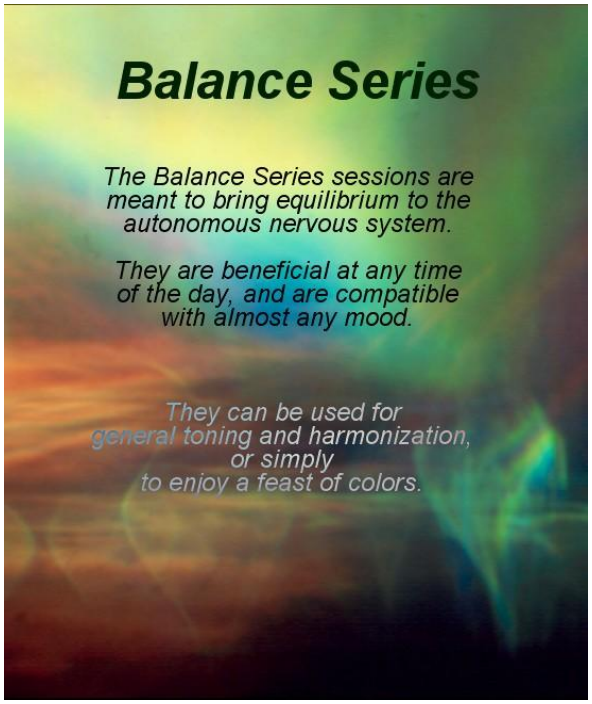


Night Light
A soft, soothing Session
specially designed to facilitate
deep and restorative sleep.
Based on the
Delta brainwaves of deep sleep,
it uses a sleep-inducing music
from Steven Halpern.
It can be helpful
in cases of insomnia.
Ideal just before going to bed...

A soft, soothing session specifically designed to facilitate deep and restorative sleep. Based on Delta brainwaves of deep sleep, it uses a sleep-inducing music from Steven Halpern. It can be helpful in cases of insomnia. Ideal just before going to bed.

DURATION: 25 minutes

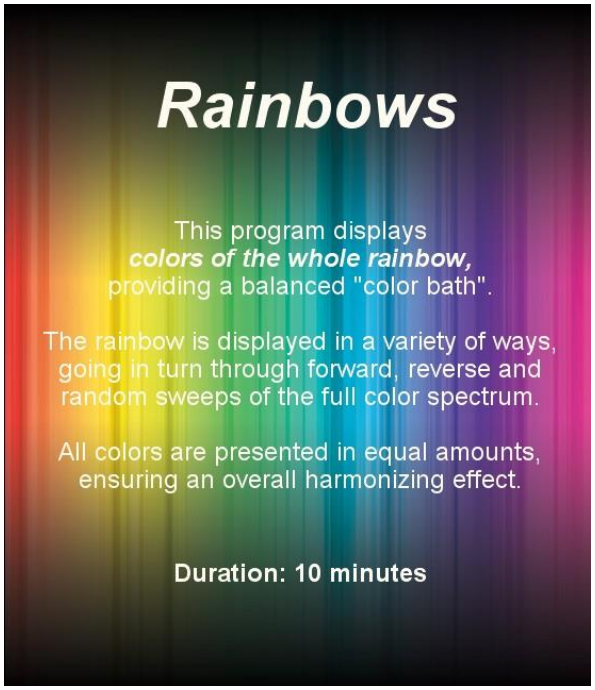
4.2 BALANCE SERIES



Balance Series
The Balance Series sessions are meant to bring equilibrium to the autonomous nervous system.
They are beneficial at any time of the day, and are compatible with almost any mood.
They can be used for general toning and harmonization, or simply to enjoy a feast of colors.

The **Balance Series** sessions are meant to bring equilibrium to the autonomous nervous system. These sessions can generally be played at any time of the day, and are compatible with almost any mood. They can be used for general toning and harmonization, or simply to enjoy a feast of colors. They can also be beneficial when one feels unstable or dispersed and wants to bring back some equilibrium in one's energy.

RAINBOWS

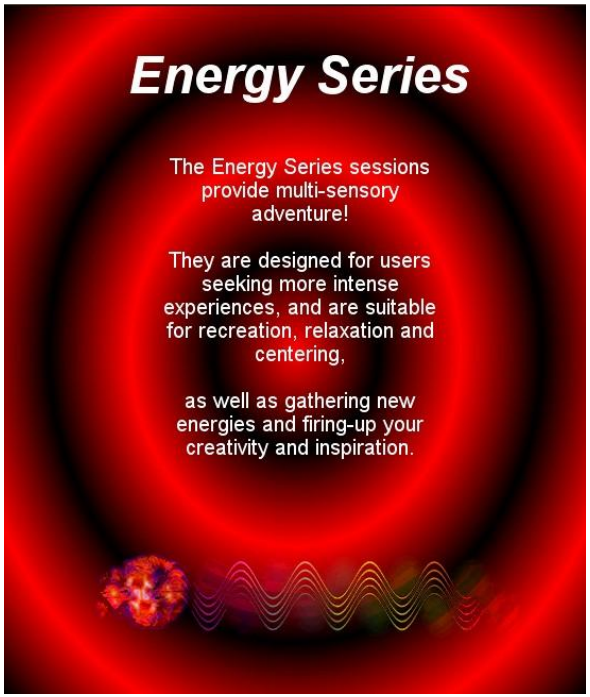


Rainbows
This program displays
colors of the whole rainbow,
providing a balanced "color bath".
The rainbow is displayed in a variety of ways, going in turn through forward, reverse and random sweeps of the full color spectrum.
All colors are presented in equal amounts, ensuring an overall harmonizing effect.
Duration: 10 minutes

These sessions displays **colors of the whole rainbow**, providing a balanced "color bath". The rainbow is displayed in a variety of ways, going in turn through forward, reverse and random sweeps of the full color spectrum. All colors are presented in equal amounts, ensuring an overall harmonizing effect. The sessions make use of the "Balancing" program built-in the Sensortech light projectors. They have a randomization feature, which ensures that the rainbows sequence is different for each playback.

DURATION: The session is available in 5, 10, 15 and 20 minutes durations.
5 and 10 minutes silent versions are also offered.

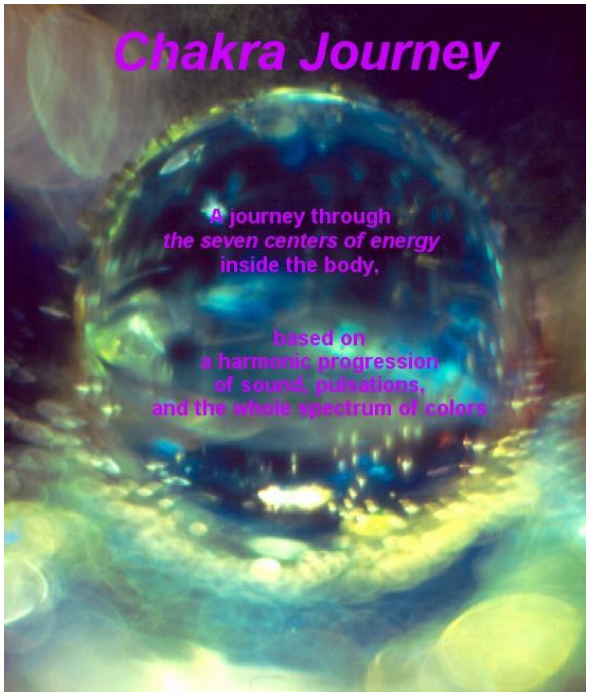
4.3 ENERGY SERIES



Energy Series
The Energy Series sessions provide multi-sensory adventure!
They are designed for users seeking more intense experiences, and are suitable for recreation, relaxation and centering,
as well as gathering new energies and firing-up your creativity and inspiration.

The **Energy Series** sessions provide multi-sensory adventure! They are designed for users seeking more intense experiences, and are suitable for recreation, relaxation and centering, as well as gathering new energies and firing-up your creativity and inspiration.

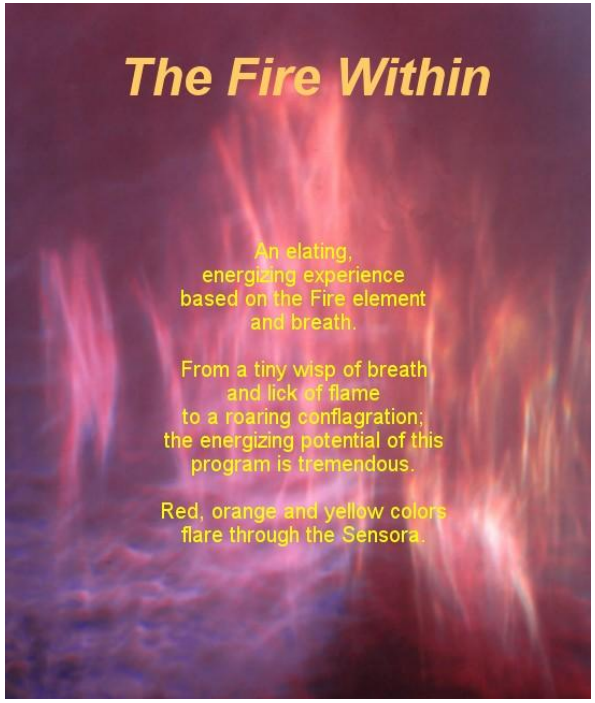
CHAKRA JOURNEY



A journey through the seven centers of energy inside the body, based on a harmonic progression of sound and of the whole spectrum of colors. All multi-sensorial components of the session (colors, light modulation pulses, sound tones, kinesthetic patterns speeds, spatial sound rotations,…) are carefully tuned in harmonic proportions.

DURATION: 24 minutes

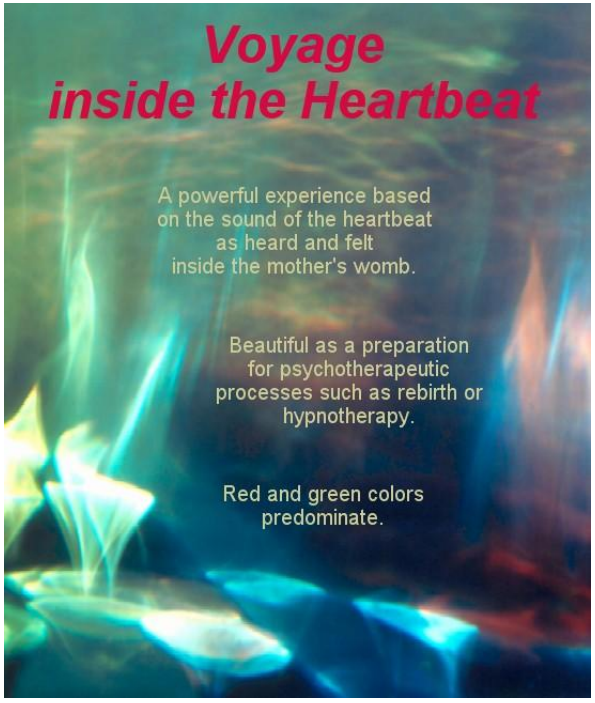
THE FIRE WITHIN



An elating, energizing experience based on the Fire element and breath. From a tiny wisp of breath and lick of flame to a roaring conflagration; the energizing potential of this program is tremendous. Red, orange and yellow colors flare through the Sensora.

DURATION: 24 minutes

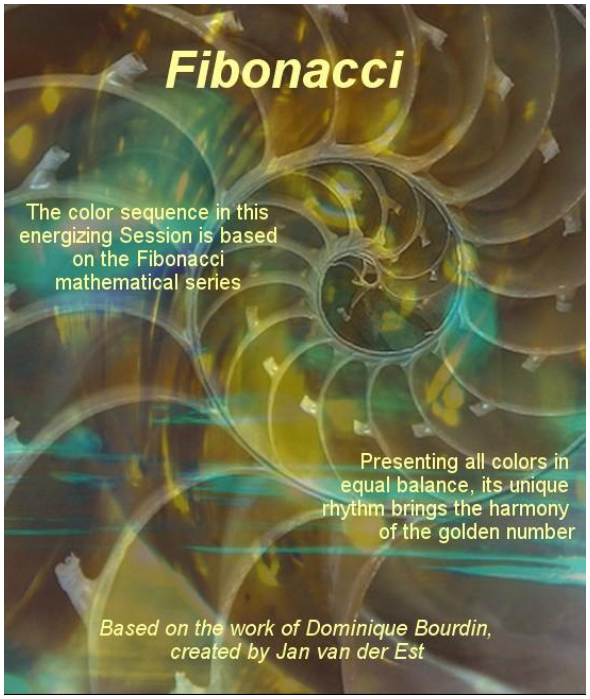
VOYAGE INSIDE THE HEARTBEAT



A powerful experience based on the sound of the heartbeat as heard and felt inside the mother's womb. Beautiful as a preparation for psychotherapeutic processes such as rebirthing or hypnotherapy. Red and green colors predominate.

DURATION: 25 minutes

FIBONACCI

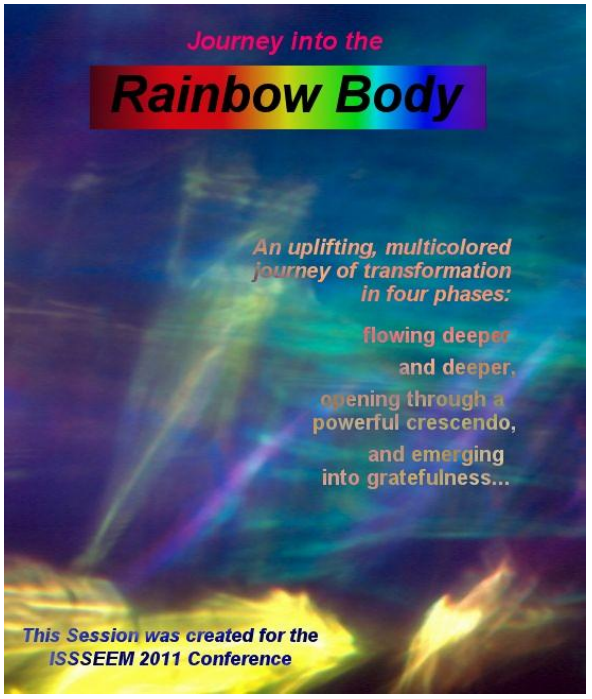


Fibonacci
The color sequence in this energizing Session is based on the Fibonacci mathematical series
Presenting all colors in equal balance, its unique rhythm brings the harmony of the golden number
Based on the work of Dominique Bourdin, created by Jan van der Est

The color sequence in this energizing Session is based on the Fibonacci mathematical series. Presenting all colors in equal balance, its unique rhythm brings the harmony of the golden number. Created by Jan van der Est, based on the work of Dr. Dominique Bourdin.

DURATION: 24 minutes

RAINBOW BODY

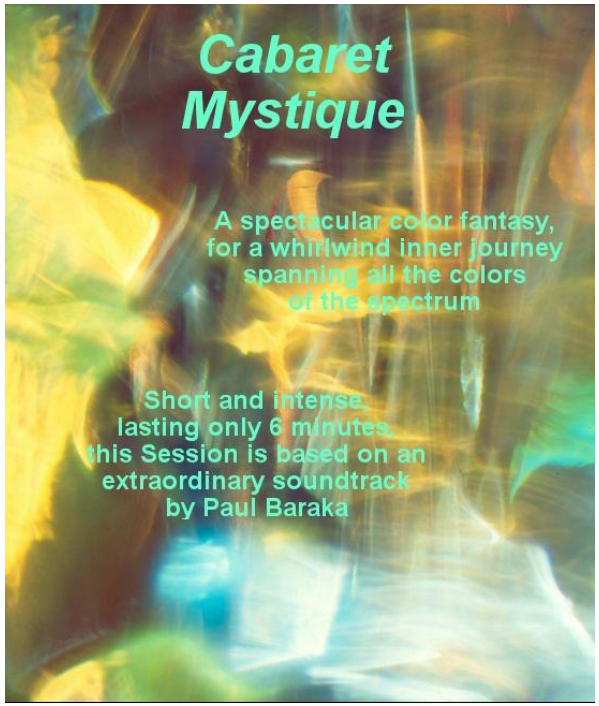


Journey into the
Rainbow Body
An uplifting, multicolored journey of transformation in four phases:
flowing deeper
and deeper,
opening through a powerful crescendo,
and emerging into gratefulness...
This Session was created for the ISSSEEM 2011 Conference

An uplifting, multicolored journey of transformation in four phases: flowing deeper and deeper, opening through a powerful crescendo, and emerging into gratefulness. This compelling Session can be used to perform an energetic "deep cleansing" of the nervous system, and can be helpful in countering depression.

DURATION: 22 minutes

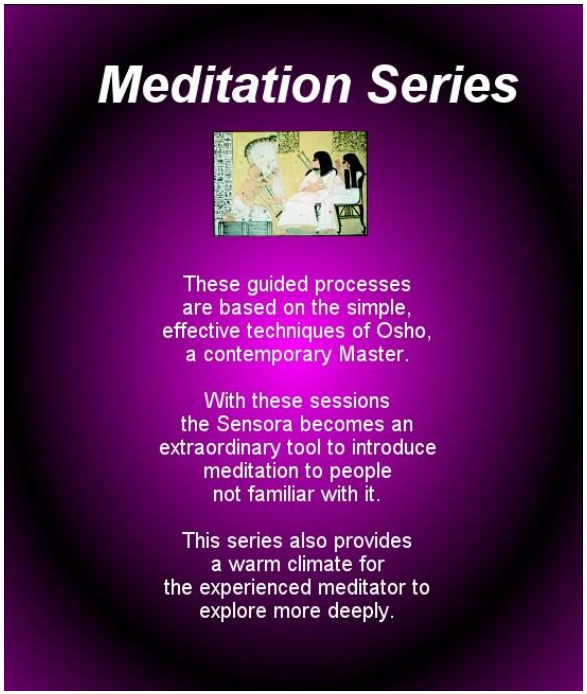
CABARET MYSTIQUE



A spectacular color fantasy, for a whirlwind inner journey spanning all the colors of the spectrum. Short and intense, lasting only 6 minutes, this Session is based on an extraordinary soundtrack by Paul Baraka.

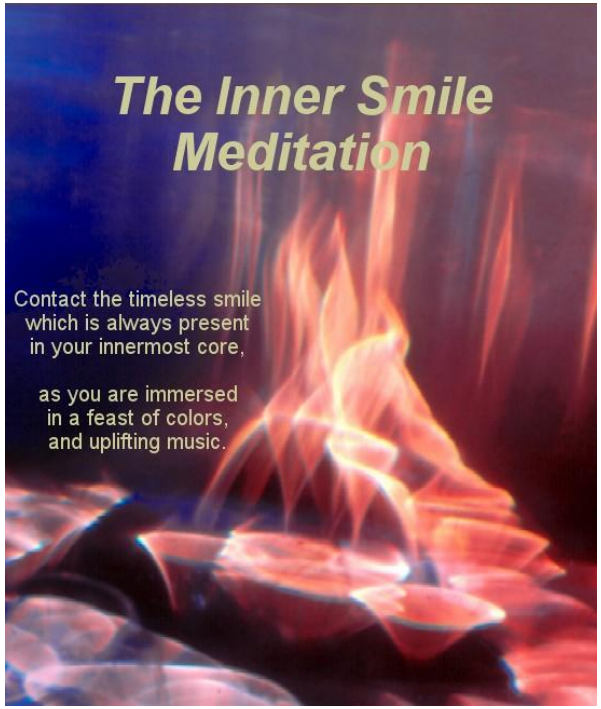
DURATION: 6 minutes

4.4 MEDITATION SERIES



The **Meditation Series** sessions are guided processes based on simple, effective techniques of Osho, a contemporary Master. With these sessions the Sensora becomes an extraordinary tool to introduce meditation to people not familiar with it. This series also provides a warm climate for the experienced meditator to explore more deeply.

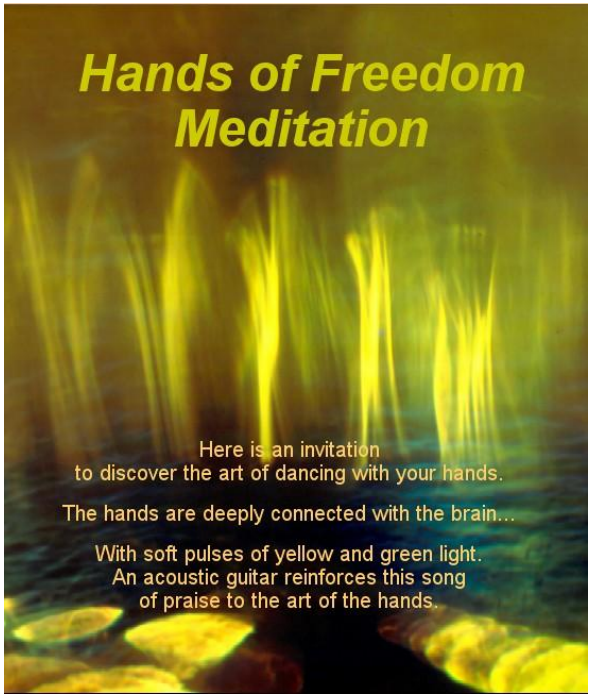
INNER SMILE



Contact the timeless smile which is always present in your innermost core, as you are immersed in a feast of colors, and uplifting music.

DURATION: 24 minutes

HANDS OF FREEDOM

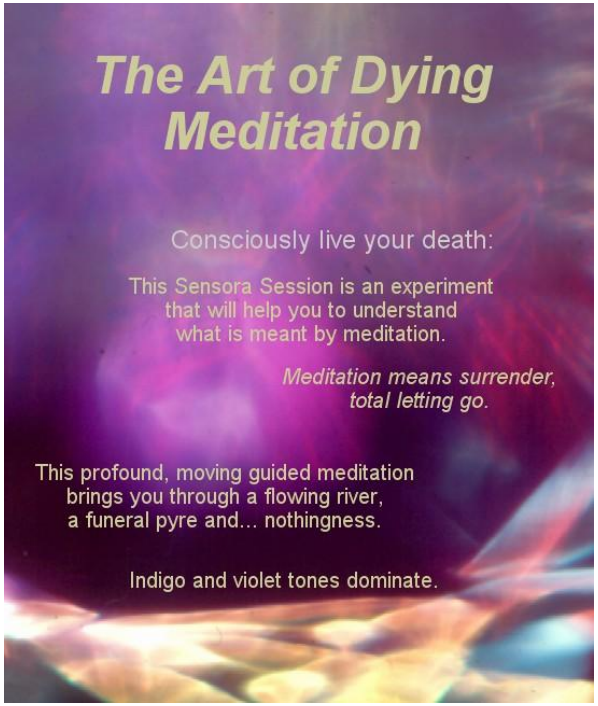


Hands of Freedom
Meditation
Here is an invitation
to discover the art of dancing with your hands.
The hands are deeply connected with the brain...
With soft pulses of yellow and green light.
An acoustic guitar reinforces this song
of praise to the art of the hands.

Here is an invitation to discover the art of dancing with your hands. The hands are deeply connected with the brain and can release many of its tensions. With soft pulses of yellow and green light. An acoustic guitar reinforces this song of praise to the art of the hands.

DURATION: 25 minutes

THE ART OF DYING

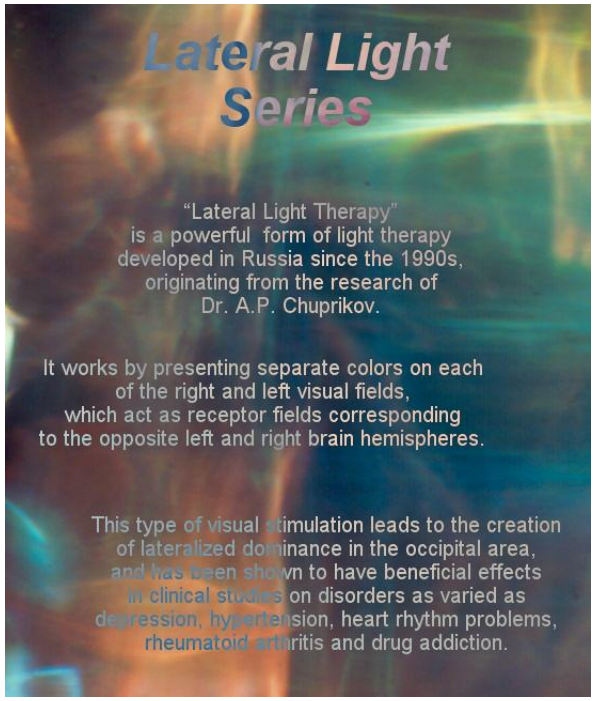


The Art of Dying
Meditation
Consciously live your death:
This Sensora Session is an experiment
that will help you to understand
what is meant by meditation.
Meditation means surrender,
total letting go.
This profound, moving guided meditation
brings you through a flowing river,
a funeral pyre and... nothingness.
Indigo and violet tones dominate.

Consciously live your death: a profound, moving guided meditation which brings you through a flowing river, a funeral pyre and... nothingness. Indigo and violet tones dominate. The sound and kinesthetic parts of this program form an intricate tapestry interweaving a succession of inner states.

DURATION: 25 minutes

4.5 LATERAL LIGHT SERIES



Lateral Light Series
"Lateral Light Therapy"
is a powerful form of light therapy
developed in Russia since the 1990s,
originating from the research of
Dr. A.P. Chuprikov.
It works by presenting separate colors on each
of the right and left visual fields,
which act as receptor fields corresponding
to the opposite left and right brain hemispheres.
This type of visual stimulation leads to the creation
of lateralized dominance in the occipital area,
and has been shown to have beneficial effects
in clinical studies on disorders as varied as
depression, hypertension, heart rhythm problems,
rheumatoid arthritis and drug addiction.

"Lateral Light Therapy" is a powerful form of light therapy developed in Russia since the 1990s, originating from the research of Dr. A.P. Chuprikov.

It works by presenting separate colors on each of the right and left visual fields, which act as receptor fields corresponding to the opposite left and right brain hemispheres. This type of visual stimulation leads to the creation of lateralized dominance in the occipital area, and has been shown to have beneficial effects in clinical studies on disorders as varied as depression, hypertension, heart rhythm problems, rheumatoid arthritis and drug addiction.

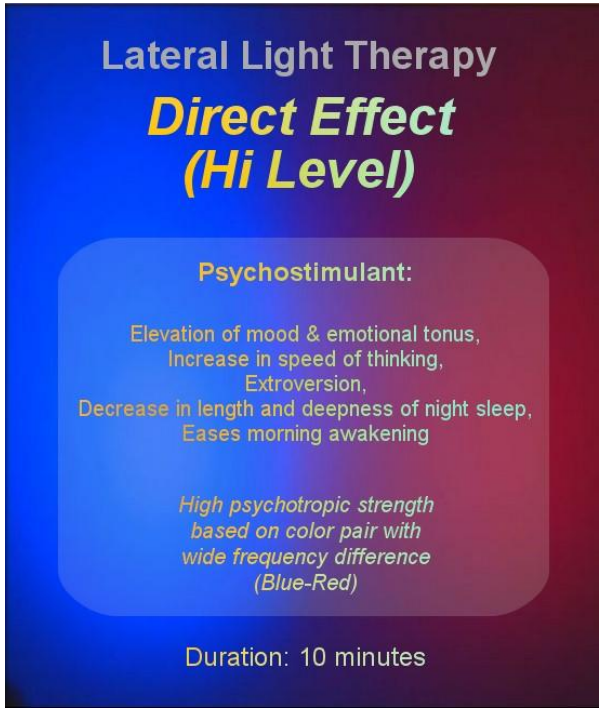
DIRECT SOFT

Psychostimulant: Elevation of mood & emotional tonus, increase in speed of thinking, extroversion, decrease in length and deepness of night sleep, eases morning awakening. The Direct Sessions are great for depressed, drained and low energy people. They reach their optimal effect within 10 minutes.

The **Soft Level** psychotropic strength of this session is based on a color pair with moderate frequency difference (Green-Orange).

DURATION: 10 minutes

DIRECT HIGH

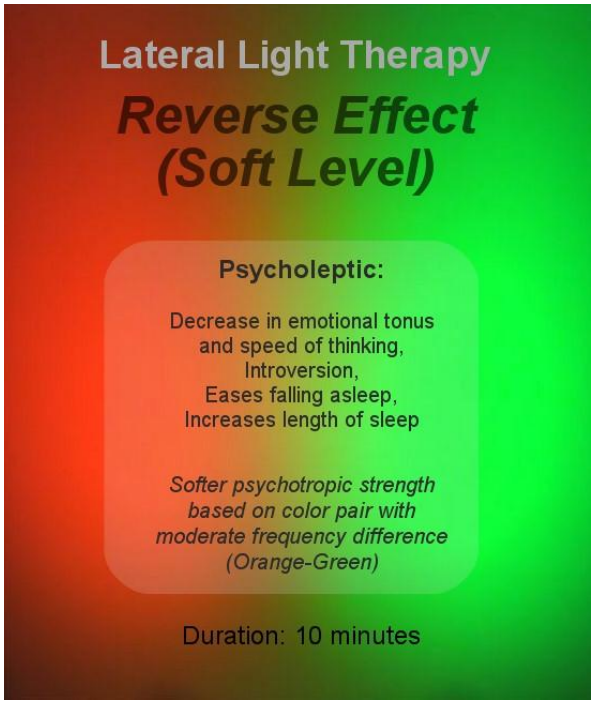


Psychostimulant: Elevation of mood & emotional tonus, increase in speed of thinking, extroversion, decrease in length and deepness of night sleep, eases morning awakening. The Direct Sessions are great for depressed, drained and low energy people. They reach their optimal effect within 10 minutes.

The **High Level** psychotropic strength of this session is based on a color pair with wide frequency difference (Blue-Red). This Session can be quite strong, so is used less commonly than the "Soft Level" version.

DURATION: 10 minutes

REVERSE SOFT

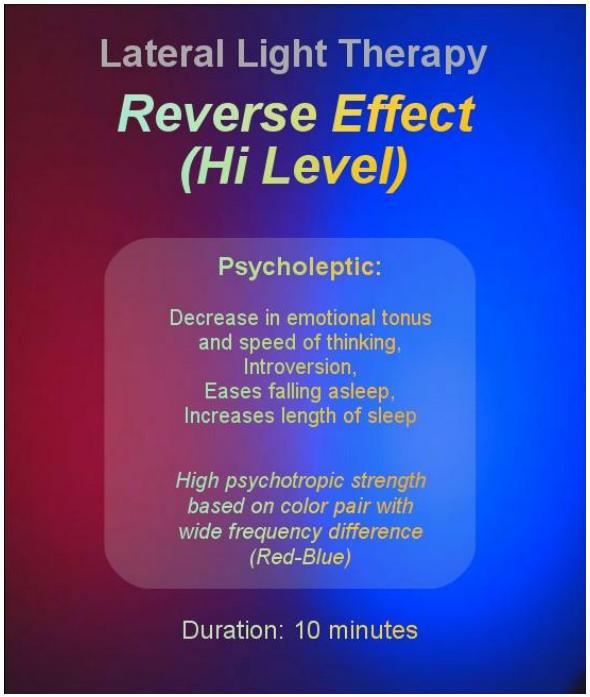


Psycholeptic: decrease in emotional tonus and speed of thinking, introversion, eases falling asleep, increases length of sleep. The Reverse Sessions are great for people with stress, anxiety or sleep problems. According to Dr. Chuprikov they reach their optimal effect within 10 to 20 minutes. Consequently, they are offered in 3 standard durations of 10, 15 and 20 minutes.

The **Soft Level** psychotropic strength of this session is based on a color pair with moderate frequency difference (Orange-Green).

DURATION: The session is available in 10, 15 and 20 minutes durations.

REVERSE HIGH

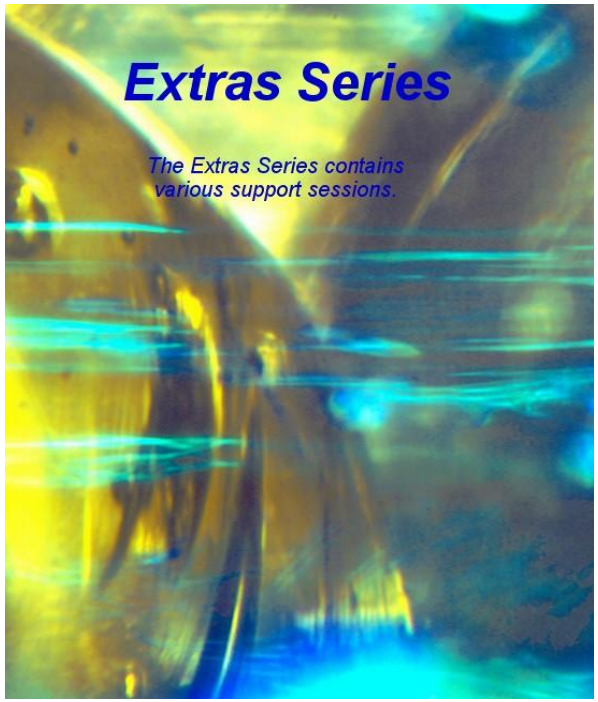


Psycholeptic: decrease in emotional tonus and speed of thinking, introversion, eases falling asleep, increases length of sleep. The Reverse Sessions are great for people with stress, anxiety or sleep problems. According to Dr. Chuprikov they reach their optimal effect within 10 to 20 minutes. Consequently, they are offered in 3 standard durations of 10, 15 and 20 minutes.

The **High Level** psychotropic strength of this session is based on a color pair with wide frequency difference (Red-Blue). This Session can be quite strong, so is used less commonly than the "Soft" version.

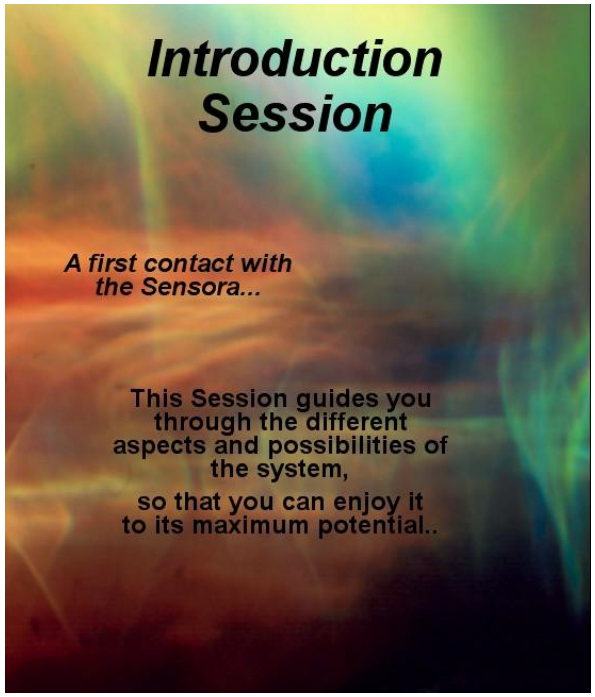
DURATION: The session is available in 10, 15 and 20 minutes durations.

4.6 "EXTRA" SERIES



The **Extra Series** contains various support sessions.

INTRODUCTION SESSION

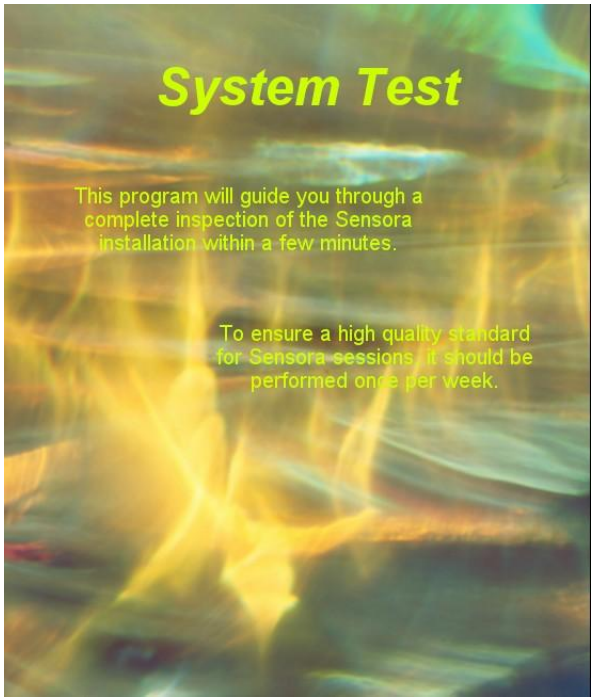


Introduction Session
A first contact with the Sensora...
This Session guides you through the different aspects and possibilities of the system,
so that you can enjoy it to its maximum potential..

A first contact with the Sensora: this narrated session guides you through the different aspects and possibilities of the system, so that you can enjoy it to its maximum potential. Goes through the whole rainbow of colors, and a wide sampling of the audio and vibrational spectrums available to you.

DURATION: 24 minutes

SENSORA-PRO SYSTEM TEST



System Test
This program will guide you through a complete inspection of the Sensora installation within a few minutes.
To ensure a high quality standard for Sensora sessions, it should be performed once per week.

This narrated session will guide you through a complete step-by-step inspection of your Sensora-Pro installation within a few minutes. To ensure a high quality standard for Sensora sessions, it is recommended to perform this system test procedure once per week.

DURATION: 10 minutes

ANNEX 1: KEYBOARD SHORTCUTS

The Sensora Player is designed to be used by clients that do not need to access settings reserved to the Sensora operator. These settings are therefore hidden from unintended modification by restricting their access through the use of dedicated keyboard shortcuts.

The following table lists all the available keyboard shortcuts:

CONTROL KEY	FUNCTION	DESCRIPTION
Control-A	Cursor **A**rrow	Toggles the cursor arrow On/Off; it is useful to hide the cursor arrow for the Touch Screen interface
Control-B	**B**lank Screen	Resets the Sensora Screen projection to black
Control-D	**D**elete Button	Hides/Shows ***"Import Session"***, ***"Delete Session"*** and ***"Rename Session"*** buttons on the **"Sequencer Sessions"** screen, allowing the management of Sequencer Sessions in your collection
Control-Q	**Q**uit Program	Exits from the program
Control-U	Scan **U**SB	Triggers scan of USB ports to detect any Sensortech instrument connected after the Sensora Player program was launched.
Control-W	**W**indow Mode	Toggles between **"Full Screen"** and **"Windowed"** display modes

Table 1 – Keyboard Shortcuts

ANNEX 2: SENSORA.INI FILE

The "Sensora.ini" file found in the "Sensora data" directory contains a number of configuration options for the Color Balancing program (as well as options for all other Sensora programs in your system). Advanced operators can edit this file using a text editor such as Notepad.

NOTE: Be careful to preserve the exact formatting of the Sensora.ini file if you edit it, otherwise the program operation may be compromised. In case of problem, you can find an intact default copy of the file in the Sensora data directory, named "Sensora.ini.def": copy and rename the file to "Sensora.ini" to restore it.

The entries in the "Sensora.ini" file are organized in sections, defined by section headers in brackets such as:

[Options]

The following table lists the entries related to the Sensora Player program:

SECTION	ENTRY	*RANGE*	*DESCRIPTION*
[Configuration]	musicVolume	0-255	Start-up Music Volume
	chairVolume	0-100	Start-up Transducer Chair volume *(only applicable to systems equipped with a Sensortech Transducer Chair, such as the TC-2 and TC-3)*
	deviceType	SD-1, SD-2, LPA-2, LPA-3	Default device type selected if no Sensortech device is found connected to the system. *(should match with your installed Sensora light projector)*
[Options]	fullScreen	0 = Window 1 = Full Screen	Start-up setting for the program Display Mode. ***NOTE:*** Setting can be toggled while program is running with keyboard shortcut Control-W
	slowPC	0 = Normal 1 = Slow PC	Set to 1 to optimize for slow PC (remove PC screen dissolves,…)
	powerDownLCD	0 = No 1 = Yes	Select 1 to is automatically power down the LCD monitor during Sensora Sessions (reduces stray lighting), 0 to disable power-down.
	hideCursor	0 = Show 1 = Hide	Start-up setting for presence of cursor arrow: set to 1 for Touch-Screen system. ***NOTE:*** Setting can be toggled while program is running with keyboard shortcut Control-A
	hideDelete	0 = Show 1 = Hide	Start-up setting for presence of ***"Delete Playlist"*** button in **"Compose a Playlist"** screen. ***NOTE:*** Setting can be toggled while program is running with keyboard shortcut Control-D

Table 2 – "Sensora.ini" Configuration Entries for Sensora Player program
